

SURFACE APPLIED TACTILE

O O O SURFACE APPLIED TACTILE

Inline Dome Pattern

DOME GEOMETRY

In accordance with ADA Regulations for Detectable Warning on Curb Ramps: Raised truncated domes with a diameter of nominal 0.9", a height of nominal 0.2", and a center-to-center spacing of 1.6" minimum and 2.4" maximum.

PANEL DIMENSIONS

Tactile Panels are available in 12"x12", 24"x24", 24"x36", 24"x48", 24"x60", 36"x48" and 36"x60" sizes and measure 3/16" thick. Panels can be custom cut to fit field conditions. All four edges of each panel have a ½" beveled edge. Each panel has 12 to 24 pre-formed fastener locations based upon panel size.

MATERIAL

A homogenous fiberglass and carbon reinforced composite which is colorfast and UV stable. Truncated domes are fiberglass reinforced for enhanced durability. The Tactile Panel color is uniform throughout and does not rely on any type of paint coating to achieve color stability.

PHYSICAL CHARACTERISTICS

Compressive Strength	28,900 psi	ASTM D 695
Flexural Strength	29,300 psi	ASTM D 790
Water Absorption	.07%	ASTM D 570
Slip Resistance	1.18 Dry/1.05 Wet	ASTM C 1028
Flame Spread Index	20	ASTM E 84
Salt Spray	No Change (200 hours)	ASTM B 117
Chemical Stain Testing	No Deterioration	ASTM 1308
Abrasion Resistance	549	ASTM C 501
Accelerated Weathering	Delta E<5.0 (2,000 hours)	ASTM G 155
Tensile Strength	11,600 psi	ASTM D 638
Adhesion to Conc. (20-180 degrees)	No Delamination or Degradation	ASTM C 903
Freeze/Thaw/Heat	No Disintegration	ASTM C 1026

INSTALLATION

ADA Surface Applied TWS Panel (Existing Concrete): TWS Panel can be easily installed (adhered, fastened & sealed) in a matter of minutes.

INCIDENTALS

Fasteners: ¼" x 1½" composite sleeve anchor with

stainless steel pin.

Adhesive: 10 ounce Tube of structural polyether adhesive.

Sealant: BASF MasterSeal NP1, Sikaflex® 1A,

or equivalent (by others).

WARRANTY

Surface Applied Tactile Panel shall be guaranteed in writing for a period of seven (7) years from date of contract's final completion. The guarantee includes breakage and deformation of the tactile warning surface material.

RADIUS TACTILE - SURFACE APPLIED

Inline Dome Pattern

DOME GEOMETRY

ADAAG and PROWAG Compliant in-line truncated dome pattern.

UNIVERSAL RADIUS TWS PANEL

Universal Radius TWS Panel is scored on backside for a 10', 15' and 20' radial condition and may be cut to accommodate site conditions. See www.adatile.com for new radius tile calculator.

RADIUS PANEL KIT

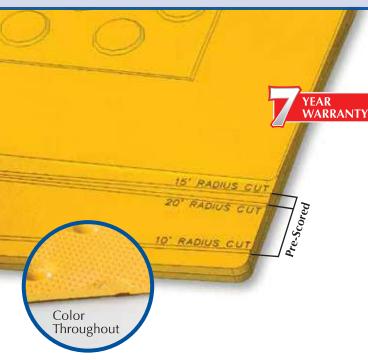

ADA Radius Surface Applied TWS Panel: 24" x 33¼", 16 composite sleeve anchors with stainless steel pins and 1 tube of adhesive.

MATERIAL

A homogenous fiberglass and carbon reinforced composite which is colorfast and UV stable. Truncated domes are fiberglass reinforced for enhanced durability. The color of the TWS Panel is uniform throughout and does not rely on any type of paint coating to achieve color stability.

PHYSICAL CHARACTERISTICS

Compressive Strength	28,900 psi	ASTM D 695
Flexural Strength	29,300 psi	ASTM D 790
Slip Resistance	1.18 Dry, 1.05 Wet	ASTM C 1028
Chemical Stain Testing	No Deterioration	ASTM D 543
Abrasion Resistance	549	ASTM C 501
Accelerated Weathering	Delta E<5.0 (2,000 hours)	ASTM G 155
Tensile Strength	11,600 psi	ASTM D 638
Load Bearing at 16,000#	No Damage	AASHTO-H20
Freeze/Thaw/Heat	No Disintegration	ASTM C 1026

INSTALLATION

ADA Radius Surface Applied TWS Panel (Existing Construction): Radius Surface Applied Panel can be easily installed (adhered, fastened & sealed) to existing concrete for applications with outer radius conditions between 6' to 21'. Each panel comes with pre-scored markings for a 10', 15' or 20' outer radius cut. The panel can be cut on site.

INCIDENTALS

Fasteners: ¼" x 1½", composite sleeve anchor

with stainless steel pin.

Adhesive: One 10-ounce tube of structural polyether adhesive.

Sealant: BASF MasterSeal NP1, Sikaflex® 1A,

or equivalent (by others).

WARRANTY

ADA Radius Surface Applied TWS Panel shall be guaranteed in writing for a period of seven (7) years from date of contract's final completion. The guarantee includes breakage and deformation of the tactile warning surface material.

IMPORTANT:

SURFACE APPLIED TACTILE

Installation Procedure

Be sure to read and understand <u>all</u> of these instructions <u>before</u> you begin.

- A• Environmental Conditions: Air and flooring temperatures must exceed 4°C (40°F) for at least 8 daytime hours for a sound and proper installation. A propane torch may be used to boost the flooring temperature to expedite the cure of adhesives and sealants.
- **B** The installation area should be cleaned of all debris, oil and grease, making sure the area is completely free of moisture. Tactile Panel may be surface applied on existing pre-cleaned substrate.

- If required, the Tactile Panel may be cut. See web site for more details.
- Place a 3/8" bead of adhesive on the frame of the bottom of each Tactile Panel.

2'x3'	2'x4'	2'x5'	require one 10-ounce tube of adhesive
	3'x4'	3'x5'	require two 10-ounce tubes of adhesive

- Set the Tactile Panel in the installation area. Make all necessary adjustments prior to fastening.
- Fasteners shall be installed in pre-formed fastener locations. Holes shall be drilled using a hammer drill with 1/4"x 2" min SDS bits. The drilled holes must be a minimum of 2" deep. Place fasteners in hole and hammer into place.
 - If additional fasteners are required, use a 1/2", six point, 82 degree countersink to add a new fastener location. Follow the same drilling method for installing the fastener.
- **G** Caulk perimeter of entire installation using BASF MasterSeal NP1, Sikaflex® 1A or equivalent.
 - All concrete dust present on the Tactile Panel resulting from the drilling process must be cleaned off of the Tactile Panel prior to using any caulking materials.

*Not recommended or warrantied for asphalt installation.

View additional photos, drawings, specifications and products on our website: www.adatile.com. Please call (800) 372-0519 with any questions.

RADIUS TACTILE - SURFACE APPLIED

Installation Procedure

Be sure to read and understand all of these instructions before you begin.

- A Environmental Conditions: Air and flooring temperatures must exceed 4°C (40°F) for at least 8 daytime hours for a sound and proper installation. A propane torch may be used to boost the flooring temperature to expedite the cure of adhesives and sealants.
- **B.** The installation area should be cleaned of all debris, oil and grease, making sure the area is completely free of moisture. Tactile Panel may be surface mounted on existing pre-cleaned substrate.
- C. Lay out the Tactile Panel on the substrate as it will appear when installed.
 - If required, the Tactile Panel may be cut. 10', 15', & 20' radius are pre-scored on backside of tactile panel. See web site for more details.
- Place a 3/8" bead of adhesive on the frame of the bottom of each Tactile Panel.
- Set the Tactile Panel in the installation area. Make all necessary adjustments prior to fastening.
- Fasteners shall be installed in pre-formed fastener locations. Holes shall be drilled using a hammer drill with 1/4" x 2" min SDS bits. The drilled holes must be a minimum of 2" deep. Place fasteners in hole and hammer into place.
 - If additional fasteners are required, use a 1/2", six point, 82 degree countersink to add a new fastener location. Follow the same drilling method for installing the fastener.
- G. Caulk perimeter of entire installation using BASF MasterSeal NP1, Sikaflex® 1A or equivalent.
 - All concrete dust present on the Tactile Panel resulting from the drilling process must be cleaned off of the Tactile Panel prior to using any caulking materials.

*Not recommended or warrantied for asphalt installation.
